Description(s) of Job(s)/Task(s)/Project(s)

Fixing the nasty bug

Activities/Work Produced

Debugging with Python, finding out the error source, try to change few lines of code. Ultimately, restart the web server to see if the bug is fixed.

Comments/Conclusion (i.e. the outcome/result of the activity)

Not fixed, I wasted a day of my life in my company. I didn't like this feeling...
